Online shopping from a great selection at Health & Household Store.

Obagi is just a name and overpriced about four times the price of the generic cream. My dermatologist here in UK sells Tretinoin cream from France and does not sell Obagi – too extensive also he sells the hydroquinone cream for pigmentation also, Obagi is expensive for that also. Tretinoin (brand names Retin-A, Avita, Renova) is a derivative of vitamin A and is the treatment of choice for comedonal acne, as well as whiteheads and hellofromsandy.com works by increasing skin cell turnover, which promotes the extrusion of the plugged material in the follicle.

) Im using tretinoin din but the generic one from hellofromsandy.com Nastop nya talaga ang padevelop na pimple, im using%. Effective siya saakin, whiteheads prone kasi ako and sa gilid ng mukha nag appear so far wala na akong problem sa white heads.
