"Exercises in Programming Style is an instant classic. In the spirit of Queneau's Exercises in Style, Cristina examines a common programming problem though the lens of different programming styles, each shaped by different hellofromsandy.coms: Exercises in Programming Style uses the same concept, but implements a short program in 33 different programming styles. Each style is defined by what constraints it imposes on the program. The program counts the occurrences of words (term frequencies) in a file.

Using a simple computational task (term frequency) to illustrate different programming styles, Exercises in Programming Style helps readers understand the various ways of writing programs and designing systems. It is designed to be used in conjunction with code provided on .
