Pectin is a sugar found in the walls of plants that can be used as a gelling agent, especially in jams and jellies. Although many plants have pectin, the peel of citrus fruits such as . for separation of useful ingredient from lemon peel. Researchers and Scientists have been working on the separation pectin from lemon peel and reporting their findings in journals of repute.

the ash were all higher in the pectin extracted from peels of orange with 70, , 35% and lemon with 50, , and 31% respectively. However, the equivalent weight of the pectin extracted from peels of lemon was higher with The amo unt of pectin extracted from orange peel and lemon peels on fresh basis was % and %, respectively. Jam made using pectin extracted from orange pectin jam .

The influence of pH and extraction time on pectin yield and composition was studied in a citric acid extraction process. The pectin yield and degree of esterification (DE) of the extracted pectin ranged from to % and to % respectively.

High-pectin citrus peel is what makes marmalade gel without added pectin. Keep in mind that it is the white pith or inner part of the citrus peel that is rich in pectin. Keep in mind that it is the white pith or inner part of the citrus peel that is rich in pectin.
